Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for screening compounds capable of modulating topoisomerase activity comprising:

- (A) incubating at least a first nucleic acid, a topoisomerase and a potential topoisomerase-modulating compound, wherein the nucleic acid comprises at least one tag, and
- (B) assaying for a nucleic acid religation product.

Although, Lynch et al. (U.S. Patent 5,998,152) teaches a method for screening compounds capable of modulating topoisomerase activity comprising:

- (A) incubating at least a first nucleic acid, a topoisomerase labeled with one tag and a potential topoisomerase-modulating compound, and
- (B) assaying for a nucleic acid bound with the tagged enzyme, Lynch et al does not teach or suggest a method for screening compounds capable of modulating topoisomerase activity comprising:

- (A) incubating at least a first nucleic acid, a topoisomerase and a potential topoisomerase-modulating compound, wherein the nucleic acid comprises at least one tag, and
- (B) assaying for a nucleic acid religation product.

In view of the absence of either teaching or suggestion of such a method for screening compounds capable of modulating topoisomerase activity comprising:

Art Unit: 1634

(A) incubating at least a first nucleic acid, a topoisomerase and a potential topoisomerase-modulating compound, wherein the nucleic acid comprises at least one tag, and

(B) assaying for a nucleic acid religation product, the present invention is novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
